

Sample Radio PSA

If you could help prevent someone you love from getting sick, you'd do it. Right?

Well, that's why it's so important to get your flu shot every year.

You might think you'll never get sick. But what about the people you're close to?

If you do get the flu, it could mean lost days at work for you, or missed days at school for your kids.

If you have asthma, diabetes, heart disease or certain other chronic medical conditions, you are at risk for hospitalizations or even death.

It's a myth that the flu vaccine gives you the flu. Get the facts about the flu. It could save your life.

So, talk to your healthcare provider about the flu shot or nasal spray.

Protect yourself. Protect your family. Prevent the flu.
